Zachary Thomas

Lead Software Engineer @ Compass Experience Labs

Sterling Heights, Michigan, United States

Summary

Lead Software Engineer and AI-focused technologist with a robust background in architecting high-availability enterprise platforms and building scalable full-stack solutions. Currently leading a cross-functional team to deliver a Customer Service Management platform using React/Next.js, Node.js, and TypeScript, while designing AWS infrastructure via CDK to maintain 99%+ uptime. My technical foundation is strengthened by an upcoming Master of Science in Software Engineering with a concentration in Artificial Intelligence from the University of Michigan-Flint (expected 2028), where I am advanced in machine learning, NLP, and intelligent systems design alongside a 3.98 GPA Bachelor’s degree. With a history of building data-driven CX tools from the ground up and a commitment to engineering excellence through mentorship and agile leadership, I bridge the gap between complex AI research and practical, enterprise-grade software deployment.

Experience

Compass Experience Labs

2 years 10 months

Lead Software Engineer

December 2024 - Present (1 year 11 months)

Columbus, Ohio, United States

Leading a cross-functional team of four engineers to deliver a high-availability Customer Service Management (CSM) platform that powers enterprise support operations.

Technical Leadership:

- Architect and implement full-stack solutions using React/Next.js frontends and Node.js microservices, all in TypeScript

- Design scalable AWS infrastructure using Infrastructure as Code (AWS CDK) for version-controlled, repeatable deployments
- Maintain 99%+ platform uptime through comprehensive observability, automated alerting, and robust incident response processes

Team & Process:

- Mentor engineers through code reviews, pair programming, and regular 1-on-1s focused on growth and technical excellence
- Drive agile delivery with sprint planning, backlog refinement, and CI/CD pipeline optimization
- Own performance management initiatives that balance individual development with team objectives

Software Engineer

January 2024 - December 2024 (1 year)

Columbus, Ohio, United States

Built customer experience (CX) tools from the ground up, delivering data-driven solutions that transformed how teams interact with and support customers.

Key Projects:

- State Tracking System: Engineered a real-time monitoring platform that analyzes customer interactions and surfaces actionable insights, enabling CX teams to optimize strategies and drive satisfaction scores
- Intelligent Coaching Platform: Developed a data-driven coaching tool that provides personalized feedback to CX teams, improving performance through real-time guidance and analytics

Approach:

- Led full development lifecycle from concept through deployment, collaborating closely with stakeholders to align technical solutions with business goals
- Integrated real-time tracking and coaching features seamlessly into existing workflows
- Iterated rapidly based on user feedback to continuously enhance tool effectiveness and adoption

Adam's Promise
Board Member
February 2026 - Present (9 months)

The National Society of Leadership and Success (NSLS)
President (University of Michigan-Flint Chapter)
January 2026 - Present (10 months)
Flint, Michigan, United States

- Served as the president for my university's branch of one of the largest leadership organizations.
- Coordinated events focused on professional growth, including resume building workshops, career networking fairs, and inspirational speaker series.
- Guided a team of executive board members in planning and delivering leadership programming that supports both academic and career success.
- Fostered collaboration between university departments and student organizations to expand opportunities for student engagement.
- Committed to creating a campus culture of goal-setting, personal growth, and leadership development skills.

Whisker
3 years 7 months

Software Engineer
July 2022 - January 2024 (1 year 7 months)
Auburn Hills, Michigan, United States

Lead developer for an internal troubleshooting platform serving engineering and customer service teams.

Key Contributions:

* Built a web application that streamlined user account and device troubleshooting workflows
* Architected a centralized authentication system deployed across 10+ internal APIs, improving security and developer experience
* Collaborated with cross-functional teams to identify pain points and deliver tools that reduced resolution times

Technical Product Specialist
July 2020 - July 2022 (2 years 1 month)
Auburn Hills, Michigan, United States

Fleet Lab
Founding Software Engineer
April 2023 - September 2023 (6 months)
Ann Arbor, Michigan, United States

Early-stage startup experience contributing to foundational engineering and product development.

Costco Wholesale
Front End Cashier
October 2014 - July 2020 (5 years 10 months)

Education

University of Michigan-Flint
Master of Science - MS, Software Engineering · (January 2026 - December 2028)

University of Michigan-Flint
Bachelor of Science - BS, Software Engineering · (December 2024 - December 2027)

Macomb Community College
Associate of Science - AS, Computer Science · (August 2023 - December 2025)

Michigan State University
Boot Camp, Full Stack Web Development · (January 2022 - July 2022)
